IT ALL STARTS WITH THE FIBER.

PrimaLoft® Silver Performance Yarn Merino Wool Blends combine ultra-fine polyester fibers with fine Merino wool to create a premium comfort solution that is soft to the touch while keeping you warm and dry. When Merino wool becomes wet, an exothermic reaction takes place, allowing the Merino wool to provide warmth, even when wet, without feeling damp or clammy. The polyester fibers' hydrophobicity allows for low retention of moisture and fast dry times.

- Proprietary Polyester Fiber Technology
- Ultra-Soft Hand Feel
- Only Utilize Non-Mulesed Merino Wool
- Dries Faster than 100% Merino Wool
